

Pivot table tutorial for importing Ontario donations data part two

In the [previous tutorial](#), we created a master file of donation data from the 2014 annual reports of Ontario's three main political parties: the NDP, Liberals and PCs.

The aim was to use the master table to create a pivot table to easily spot trends such as the most generous donors.

The pivot table we created only covered the year 2014. Now we want include the previous year. This extra data allows the pivot table to perform the additional task of grouping donations by year, allowing us to determine whose contributions increased the fastest.

So let's get started.

- 1) Return to the [Elections Ontario site](#) and select the "Contributions to registered political parties link".
- 2) Select the Ontario Liberal Party, and then the "ANNUAL CONTRIBUTION – 2013", and hit the Search tab.

CONTRIBUTIONS TO POLITICAL PARTIES

Party : ONTARIO LIBERAL PARTY

Contribution Report : ANNUAL CONTRIBUTION - 2013

The table below is broken down into the following columns: Contributor / Deposit Date / Reporting Date / Contribution Amount / Aggregate Amount.

- The "contributor" column represents contributors who have donated over \$100 to the political party
- The "deposit date" column represents the date the political party deposited the contribution into the appropriate depository on record with the CEO
- The "reporting date" column represents the date the political party's CFO filed the contribution report with the CEO
- The "contribution amount" column represents the amount from a single contribution in excess of \$100 or a contribution from a single source that in aggregate exceed \$100
- The "aggregate amount" column represents the total amount of contributions from the contributor during this period

- 3) Select the Download tab to save the file in your download folder. As we did in the previous tutorial, name the text file with something like "OntarioLiberals2013".
- 4) Repeat the same process for the NDP and PCs.
- 5) Now you should have three properly named files in your folder.

- 6) Open the Excel workbook that contains the 2014 donation files and go to your first original worksheet. It doesn't matter which party.

- 7) Either use your short-cut keys, or scroll to the bottom of the worksheet to the first available cell in column A.
- 8) Import the text file.

23) Repeat the same process for two remaining political parties.

24) Your master table should have 120,143 rows or records.

25) We can account for the new data in the pivot table one of two ways: select the “refresh” icon, or simply create a new table.

- 26) At the end of the previous tutorial, we SUMMED and COUNTED the values, allowing us to determine how much, and how many times donors shelled out cash.
- 27) In order to avoid a pivot table that's too busy and difficult to read, lose the COUNT value column.
- 28) With the additional year, we'll want to compare donations for 2013 and 2014. We can do this by looking the aggregate amounts for each party, or individual donors.
- 29) Leave the "Party" in the pivot table's "Column" section, and add "Year".
- 30) Leave the "Aggregate Amount" in the "Value" section and make sure that your SUMMING donations.
- 31) Your pivot table should look like this:

- 32) Of course, there are many ways to pivot this data. For instance, we can use the "Report Filter" to select the donors by political party. To do this, we would move Political Party from the "Column" section to the "Report Filter".
